# NICE RESPONSE TO COVID-19

## **NICE remains open for all services.**

With the introduction of new lockdown restrictions from November 5th we are pleased to announce that all our vital services will remain open for our families. NICE plays a significant role in the health, wellbeing, education and therapy needs for our children and adults with long term conditions. In accordance with government guidance we can remain open to our current families and welcome new ones who may wish to seek our help.

We continue to strive to ensure that our environment reduces any risk and are following strict measures to support this. These include:

- All staff working directly with children and adults will be wearing appropriate PPE
- Staff and participants observe 2m distance when moving around the building
- Reception areas have limited timed entry to reduce footfall
- NICE is closed to all but essential visitors
- Sanitising stations are available throughout the buildings
- Children's and adults services are retained within their own separate building
- Staff are maintaining departmental bubbles and working from home whenever possible
- We have retained a range of remote services to ensure that we can reach everyone who needs our support
- Each individual undertakes a risk assessment so we can provide the safest and most effective provision: remote, group or individual
- Increased cleaning regime at regular intervals during the day
- Increased awareness of hand washing and cleanliness

Each department will have their own detailed procedures which are made available to the families/students attending. We are constantly monitoring our procedures to ensure that everyone who comes to NICE is as safe as possible.

## **PLEASE SUPPORT US - WE NEED YOU MORE THAN EVER**

Charities, such as NICE, do however require funding over this period to ensure that they can continue to provide services now and in the future. We have had to cancel all our events for the foreseeable future and this has resulted in a significant loss of income. We are working hard to mitigate the impact of this while simultaneously supporting all our families. If you feel able to help or support in any way please contact us.
